PROJECTS

AIRBNB - An upgraded version of Airbnb built with React, Next.js and Tailwind. The project utilizes MongoDB as a database and integrates PayPal and Stripe for payments. It allows for fast login with Google Auth, incorporates maps with React Leaflet and renders models of buildings made in Blender,

with Three.js. Hosted on Vercel.

SZAFRAN PROJEKT - A Single Page Application designed in FIGMA, developed and deployed for a Traffic Management company. As well as a Node server that stores and manages work files from all machines on the local network.

LANGUAGES

English, Polish, Japanese
